201

Dear Mr. Richter:

RE: In the Matter of City of St. Louis, Missouri
Docket No. 88-F-0012

We have reviewed the August 12, 1988 letter from Mr. Haug of Lafser & Schreiber regarding the above referenced matter. In this letter, Lafser & Schreiber certified, pursuant to Section XX.2 of the Administrative Order on Consent entered in this matter, that all work required on that portion of the site designated as Midcoast Property on figure 1, attached hereto, had been completed.

Section XX.2 of the Consent Order addresses only the Midcoast Property and, based upon the information provided by Lafser & Schreiber, the Environmental Protection Agency hereby notifies the City of St. Louis that it concurs that all work contemplated by the Consent Order on the Midcoast Property has been completed. This notification addresses only the Midcoast Property and is provided on condition that any construction on Midcoast Property not affect in any way actions under the Consent Order on other portions of the site.

Also, it should be noted that the Agency acknowledges receipt of sample data revealing the presence of organic and semivolatile compounds. The City should be aware that this data may indicate ground water contamination caused by sources not addressed by the Administrative Order on Consent.

If you should have any questions regarding this matter, please contact Gary Kepko.

Sincerely yours,

David A. Wagoner
Director
Waste Management Division
